VNcomplete

VNcomplete

With Voicenet Solutions you don't need to make a large financial investment to enjoy a state-of-the-art communications solution for your business.

Inclusive Service:

Free anytime UK landline calls**

All national and local calls to landlines in the UK are free**. All other calls are substantially reduced, giving your company significant savings.

Free 'on-net' calls anywhere in the world

Free, unlimited calls to anyone on your business network, or to other Voicenet Solutions customers, anywhere in the world.

State-of-the-art handsets

Voicenet Solutions offers a selection of advanced phones and adaptors from the world's leading manufacturers. Choose specific handsets to suit your business or individual employee needs.

Advanced business features

Voicenet Solutions offers a business grade telephone service which will enhance connectivity and increase efficiency.

Full service training from Voicenet Solutions

To make sure you and your colleagues have full knowledge on the usage of the VNcomplete business grade system and the advanced features, you'll be offered thorough, straightforward training from the moment the system is set-up.

Full scalability

With VNcomplete you don't need to worry about your business outgrowing your telephone system. You can add new members and locations to your business voice network when you wish.

Quality of Service and ADSL/SDSL broadband

We offer Quality of Service mechanisms with a QoS router, ensuring the smoothest transition of data and the highest quality of calls. Plus we'll provide you with a sophisticated business grade broadband system, tailored to your specific data traffic needs.

Session Border Controller security

Session Border Controller security is a single solution that works with your existing firewall and safeguards the network against service disruption. Furthermore it protects the privacy of IP addresses and telephone numbers from third parties allowing you to enjoy all the benefits of VoIP without any of the worry.

Seamless system integration with no maintenance costs

VNcomplete is a ready to go business grade system, which does not require complicated installation but allows you to port your existing telephone numbers and start using the advance features immediately. What's more, it requires no expensive onsite PBX equipment, with no ongoing maintenance costs and service charges, ensuring more significant savings.
